

THE OAKLAND PUBLIC SCHOOLS

ADMINISTRATIVE OFFICES
315 RAMAPO VALLEY ROAD
OAKLAND, NEW JERSEY 07436

August 24, 2017

Dear Oakland Community:

Our final test results from the lead water testing have been posted to each school's webpage.

As per State mandate we have performed the required remediation for each outlet that tested above the acceptable level. In some cases, we removed the outlet completely and opted to install a water cooler in its place. We are clearly marking those water outlets (sinks) that are safe for hand washing only. In addition to the verbiage there will also be a picture on the sign making it clear not to drink from that outlet.

We would like to take this opportunity to thank the Oakland community for their patience during this process and to reassure all that we will be diligent in making sure our schools remain a healthy environment for all.

Respectfully,

Rachel DeCarlo
Business Administrator/Board Secretary
